

Steel / CERA Combination Block Sets

These sets make a very economical package that keeps the cost of ownership to a minimum. A ceramic material, with a reputation for its high resistance to abrasion, has been adopted for the frequently-used 1mm, 2mm, 3mm, 4mm, 5mm and 10mm blocks to reduce wear. Compared to standard all-steel sets this minimizes the total accuracy drop over time and so reduces maintenance costs.
